## SUMMARY

Versatile software developer with a strong foundation in web development, experienced in both front-end and back-end technologies. Skilled in designing, building, and managing scalable applications with clean, efficient, and maintainable code. Committed to continuous learning through hands-on projects and always eager to simplify complex challenges with thoughtful, user-focused solutions.

## EXPERIENCE

### American Board Of Family Medicine

#### **Software Developer:** *May 2024 - Current*

- Developed, updated, and maintained multiple WordPress websites, ensuring branding consistency and adherence to functionality standards
- Contributed to rebuilding a C# web application by enhancing user interfaces and implementing new features to improve user experience
- Collaborated on modernization of a legacy PHP application, redesigning the front end with Angular and migrating the back end to C# with Azure integration

### Intelliwire

#### **System Administrator:** *March 2022 - May 2024*

- Configured multi-server environments to ensure uptime, performance, and scalability environments to ensure uptime.
- Managed hundreds of hosting accounts across varied infrastructures including IIS, cPanel, and Google Cloud.
- Provided technical support and implemented server-side optimizations for existing client websites.

### eLink Design

#### **Web Developer:** *October 2022 - May 2024*

- Developed custom websites in LAMP stack, working on several proprietary CMS platforms.
- Launched multiple client-focused WordPress sites, tailoring functionality and design to meet business goals.
- Participated in full project cycles from planning and development to launch and post-launch support.

## SKILLS
